

LEARNING WEBCASTS

IRAS/HRA for Sponsors/Research Teams

We have developed a webcast; IRAS/HRA which is aimed at anyone who undertakes research in an NHS setting. This is a basic introduction to the IRAS process for applying for NHS permission to undertake research with NHS patients.

Please click on [this link](#) to access the Webcast (time approx 30 mins).

For your certificate or any queries please email: training.crnwestmidlands@nihr.ac.uk

Making IRAS Work for Your Research Amendments

We have developed a webcast; Making IRAS Work for Your Research Amendments which is aimed at anyone who undertakes research in a NHS setting. This is a basic introduction to amending an existing IRAS application.

Please click on [this link](#) to access the Webcast (approx 20 mins).

For your certificate or any queries please email: training.crnwestmidlands@nihr.ac.uk

Genomics for Primary Care

Genomics

The use of genomics in medicine provides incredible opportunities and new ways to predict, prevent, diagnose and treat disease. Funded by Health Education England's Genomics Education Programme (GEP) and working in partnership with key stakeholders from Genomics England, NHSE and other professional bodies, the RCGP is creating educational and training resources to ensure that the Primary Care workforce of today and the future is equipped to respond to the fast-paced developments in genomics.

Genomics Webinars

- Podcast 1: [An introduction to genomics in primary care from Helen Stokes-Lampard](#)
- Podcast 2: [An introduction to genomics basic terminology and the potential for primary care involvement](#)
- Podcast 3: [Potential impact of applications of genomic medicine in primary care citing the importance of family history and conditions seen through secondary care specialties](#)
- Podcast 4: [Considerations around the ethical, social and legal implications of genomics in primary care. Discussion around direct consumer testing and pharmacogenomics](#)
